GENERAL INSTRUCTIONS

How To Read Charts: Each of the designs is shown in chart form. Each colored square on the chart represents one Cross Stitch. Each square is shown in color, and in most cases, also with a symbol. This method of charting with color enables you to see approximately what the design will look like. By giving you a symbol also, the guesswork of determining shading is eliminated. The straight lines on the chart indicate Backstitching. These lines are shown either in color or black; the color to use is indicated on the color key.

Counted Cross Stitch: Work one Cross Stitch to correspond to each colored square on the chart. For horizontal rows, work stitches in two journeys ***(Fig. 1)***. For vertical rows, complete each stitch as shown ***(Fig. 2)***.

Fig. 1

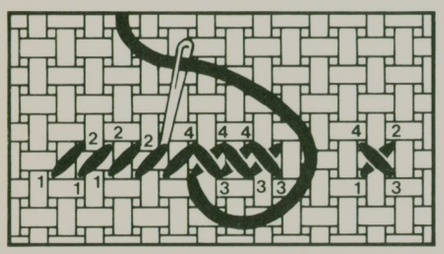

Fig. 2

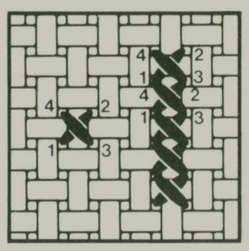
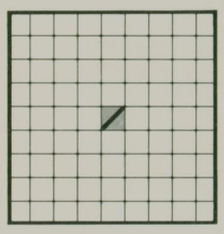


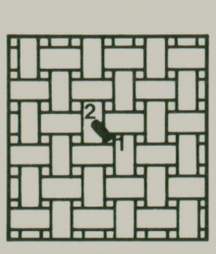
When the chart shows a Backstitch crossing a colored square ***(Fig. 3)***, a Cross Stitch ***(Figs. 1 and 2)*** should be worked first, then the Backstitching ***(Fig. 5)*** should be done on top of the Cross Stitch.

Fig. 3



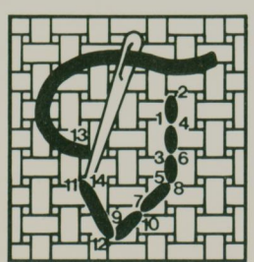
Quarter Stitch (¼X): When working on Aida or other large weave fabric, you may have to make a compensating Quarter Stitch to fill the remaining small area denoted by a triangular shape of color on the chart and on the color key. Come up at 1 ***(Fig. 4)*** between threads; then split thread to go down at 2.

Fig. 4



Backstitching: Outline detail (shown on chart and on color key by black or colored straight lines) should be worked by Backstitching ***(Fig. 5)*** after the design has been completed.

Fig. 5



FINISHING

Padded Jar Lid: Padded circle mounting kits may be purchased for both regular and wide mouth mason jar lids; mounting instructions are included in package. However, you can make your own padded circle mounting kit. Using jar lid (flat piece) for a pattern, cut a circle from adhesive mounting board. Using inner opening of jar lid band (screw ring) for a pattern, cut a circle of batting. To make padded circle, center batting on adhesive side of mounting board and press into place. Trim stitched piece ½" larger on all sides than padded circle. Center stitched piece on padded circle and press firmly onto adhesive surface. Trim edges of stitched piece close to mounting board and insert into jar lid band. If desired, glue flat lid to back of mounting board. Decorate as desired.

PROJECTS

Regular size mason jar lids are 2⅝" dia; bands have a 2¼" dia opening. Wide mouth lids are 3¼" dia; bands have a 2¾" dia opening.

*When stitched on Aida 18, design will fit a regular jar lid.
†When stitched on Aida 14, design will fit a wide mouth jar lid.
‡When stitched on Aida 11, design will fit a wide mouth jar lid.
